What is Gluco-Share?

Gluco-Share is a social media application and mobile device monitoring service for persons living with diabetes and the individuals who care about them.

More than just an app, Gluco-Share is a tight community built around the principles of trust, accountability, and support among the family and friends affected by diabetes.

Through these three principles, the app’s cornerstone features of “check” “share” “reward” are implemented in novel ways to motivate all participants to attain their individual health challenges, particularly as it pertains to the frequency of checking one’s blood glucose value.
The foundation of the Gluco-Share concept is based on three simple principles: Check – Share - Reward.

**CHECK**
(advocates frequency & consistency)

**SHARE**
(advocates social interaction, notifications, & support)

**REWARD**
(creates a redeemable point system)
Checking Glucose Values is not about the numbers – it is about the frequency.

So Gluco-Share sets goals and challenges based on certain times of day to encourage, motivate, and support sticking to a regimen.
SHARE

(Promotes Social Interaction, Assists with Reminders and Alerts, and Supports the Need for Support, Encouragement, and Acknowledgement)

When entering Glucose Values, notifications and information can be instantly shared with friends and family who are involved in supporting the user in attaining their goals.

And the user is in complete control of who gets to see their information and exactly what they see.

The goal is to engage support, communication, and remind the user that “You are NOT alone. We are in this together.”
Without rewards, there is no strong motivation.

So Gluco-Share recognizes achievements in personal goals with reward points based on levels of completion, frequency, and timeliness.

Points based on challenges quickly add up to points that can be used for games, redeemed for rewards, and bartered with other members for an additional show of support.
CHALLENGES

Choose the challenge.

Are you a night owl?

Do you check your levels at Lunch?

Do you prefer to check when you rise and shine?

The user sets the challenges and lets Gluco-Share help them stick to them and accomplish their goals.
NOTIFICATIONS, ALERTS, and CHATS for SUPPORT

In-app Chatting, that enhances the support model and gives even more social interaction.

Peace of mind with reminders, alerts, and notifications.
To protect under-aged children, Gluco-Share puts the parent in complete control of options, permissions, and safeguards.

There is even a section that allows parents to completely monitor any child’s activities, permissions, chats, and interactions with their friends.
Enhanced Features – Facebook Integration

Login via registered Email account

Login via Facebook account

App version that works on Facebook keeping the user on their Facebook account allowing another avenue for users to easily access Gluco-Share
Partnered with TELCARE
